Education

B.Tech, National Institute of Technology, Calicut
CGPA: 7.49/10

Kerala
2019 - 2023

Work Experience

Grid Dynamics | *Software Engineer*

Sept 2023 – Present | Hyderabad, India

Ford Motor Company

Platform Engineering Team

- Led **frontend development** for a **self-service CI/CD platform**, simplifying cloud and deployment workflows for **200+ developers** through intuitive dashboards.
- Designed scalable **backend APIs** integrating **enterprise DevOps tools**, deployment pipelines, and infrastructure services.
- Built reusable **React components** and scalable **fullstack modules**, reducing development effort by **30%** and improving feature delivery speed.
- Collaborated with platform engineering teams to improve **developer onboarding**, automation, and platform usability.

Mars Petcare

Care Development

- Developed **backend workflows** and **RESTful APIs** for a **Campaigns Manager platform** managing **12+ healthcare SDKs**, including dog poop scan and tooth scan features.
- Automated **SDK build pipelines** and **JavaScript bundle generation**, improving release efficiency and maintainability.
- Engineered reusable **React** and **Ant Design** components, improving development efficiency by **33%** and reducing rendering time by **22%**.
- Achieved **83%+ test coverage** using **Vitest**, reducing regression issues by **35%**.

Projects

Software Unit Testing

- Created a system that scans provided code snippets or GitHub repositories, analyzing structure and functionality to generate accurate and reliable unit test cases.
- The system generates comprehensive unit tests for multiple languages, including Python, JavaScript, and React, ensuring nearly 100% code coverage across diverse codebases.
- Provides generated test cases to ensure the source code works correctly in various scenarios, reducing manual QA effort.
- Generate a detailed reporting module that produces comprehensive documentation including codebase description, generated test cases with explanations, and execution results for developer reference.

Achievements

Grid Dynamics Hackathon 2025 – First Prize (Team Winner)

- Built an AI-powered hiring platform leveraging LLMs to match CVs with job descriptions, auto-generate interview questions, evaluate responses in real time, and provide proctoring with automated feedback to streamline recruitment workflows.

Delivery Team of the Year 2025 – Grid Dynamics Annual Awards

- Recognized as part of the top-performing delivery team for exceptional execution, collaboration, and business impact across critical client projects.

Skills and Expertise

Programming:	C++, Javascript, Python, Java
Backend	Node.js/Fast API, REST APIs, GraphQL, MongoDB
Frontend & Tools:	HTML5 & CSS3, React.js, Next.js, AntDesign, MUI, Git
Concepts:	OOPs, DBMS, System Design, Design Patterns
Problem Solving:	DSA questions LeetCode , Codeforces , CodeChef , GeeksforGeeks

Others

Languages: Hindi, English
Interests: Books, Badminton, Cricket, Music
